

TECHNOVA SOLUTIONS PVT. LTD.

MASTER COMPANY KNOWLEDGE BASE

Founder: Sreehari V S

Company Knowledge Handbook for the AI Company Knowledge Assistant.

Version 3.0 • 2026

1. Company Identity and Overview

Legal Name

TechNova Solutions Pvt. Ltd.

Short Name

TechNova

Company Type

Private limited software and technology company.

Founded

2019.

Founder

Sreehari V S.

Headquarters

Kochi, Kerala, India.

Other Offices

Bengaluru, Karnataka and Pune, Maharashtra.

Industry

Information Technology, Software Development, Artificial Intelligence, Cloud Computing, Data Analytics, and SaaS.

Company Size

Approximately 250 employees in the 2026 company profile.

Mission

To build practical, reliable technology that helps organizations automate work, understand data, and deliver better digital services.

Vision

To become a trusted technology partner for organizations adopting cloud, AI, and intelligent software systems.

Tagline

Build Smart. Scale Securely.

Core Values

Customer focus, ownership, continuous learning, collaboration, transparency, engineering excellence, security, and responsible AI.

Official Website

TechNova's company website is maintained by the organization and provides product, career, and contact information.

2. Founder and Leadership

Founder — Sreehari V S

Sreehari V S founded TechNova Solutions Pvt. Ltd. in 2019. He established the company around software engineering, artificial intelligence, cloud computing, and practical business automation.

Founder Background

Sreehari V S has a technical background in computer science and software development and promotes engineering-led product development.

Chief Executive Officer

Sreehari V S serves as the Founder and Chief Executive Officer.

Chief Technology Officer

Ananya Krishnan leads engineering architecture, platform development, and technical strategy.

Chief Operating Officer

Vivek Nair oversees business operations, delivery, and internal processes.

Head of AI

Dr. Meera Menon leads machine learning, generative AI, NLP, and AI research initiatives.

Leadership Principle

TechNova leadership emphasizes measurable customer value, secure engineering practices, employee learning, and responsible deployment of AI.

3. Business Areas and Services

Software Product Development

TechNova develops web, mobile, cloud, and enterprise software products.

Artificial Intelligence

Services include machine learning, natural language processing, document intelligence, semantic search, generative AI, recommendation systems, and predictive analytics.

Cloud Solutions

TechNova provides cloud migration, cloud-native application development, containerization, deployment automation, and cloud monitoring.

Data Analytics

The company develops dashboards, reporting systems, data pipelines, analytics platforms, and business intelligence solutions.

Full-Stack Development

Engineering teams build frontend and backend applications using modern web technologies and REST or GraphQL APIs.

Consulting

Technology consulting includes architecture reviews, digital transformation, AI adoption, software modernization, and engineering process improvement.

Managed Services

Selected enterprise customers receive application maintenance, monitoring, incident response, and technical support.

4. Products

NovaFlow

A workflow automation platform for approvals, task routing, business process automation, notifications, and workflow analytics.

NovaAI

An artificial intelligence platform providing document processing, semantic search, question answering, machine learning APIs, and generative AI capabilities.

NovaInsight

A business analytics platform providing dashboards, scheduled reports, metrics, data exploration, and role-based analytics access.

NovaCloud

A cloud management and deployment platform used for application environments, deployment automation, monitoring, and infrastructure operations.

NovaDesk

A customer support and ticket management product for service requests, incidents, knowledge articles, and support analytics.

5. Technology Stack

Programming Languages

Python, Java, JavaScript, TypeScript, SQL, and Dart are commonly used across teams.

Frontend

React, Next.js, TypeScript, HTML, CSS, and modern component libraries.

Backend

Django, Django REST Framework, FastAPI, Node.js, Express, and Java-based services.

Databases

PostgreSQL is the primary relational database. MySQL and MongoDB are used for selected applications.

Caching

Redis is used for caching, session storage, rate limiting, and background job coordination.

AI and ML

Python, PyTorch, TensorFlow, scikit-learn, Hugging Face models, vector databases, embedding models, and large language model APIs.

RAG Technologies

Document loaders, text splitters, embeddings, vector similarity search, metadata filtering, retrieval pipelines, prompt templates, and LLM generation.

DevOps

Git, GitHub, Docker, Kubernetes, CI/CD pipelines, Linux, cloud infrastructure, logging, monitoring, and automated testing.

APIs

REST APIs and GraphQL APIs are used for application integration. Internal services use authenticated API access.

6. Departments

Engineering

Frontend, backend, mobile, platform, DevOps, QA, and software architecture teams.

Artificial Intelligence

Machine learning, NLP, generative AI, computer vision, data science, and AI platform teams.

Product

Product managers and analysts define product requirements, roadmaps, user stories, and product metrics.

Human Resources

Recruitment, onboarding, employee records, learning, performance management, and employee engagement.

Finance

Accounting, payroll coordination, budgeting, procurement, invoicing, and financial reporting.

Sales

Customer acquisition, enterprise accounts, proposals, and sales operations.

Marketing

Branding, content, events, campaigns, product communication, and digital marketing.

Customer Success

Customer onboarding, adoption, support coordination, renewals, and customer feedback.

Information Security

Security policies, access control, vulnerability management, incident response, and security awareness.

7. Office Locations

Kochi

Headquarters and primary AI and platform engineering center.

Bengaluru

Engineering, enterprise delivery, and technology operations.

Pune

Software engineering, QA, and customer delivery teams.

Office Hours

Standard office hours are 9:30 AM to 6:30 PM, Monday through Friday.

Core Collaboration Hours

10:30 AM to 4:30 PM.

Work Model

Hybrid work is available for eligible employees and teams.

Remote Work

Eligible employees may work remotely up to two days per week. New employees generally work from the office during their first four weeks unless an exception is approved.

8. Fresher and Entry-Level Careers

Eligible Qualifications

Computer Science, Information Technology, Computer Engineering, Electronics, and other relevant technical degrees or equivalent qualifications may be considered.

Typical Fresher Roles

Software Engineer, Python Developer, Java Developer, Frontend Developer, Full-Stack Developer, QA Engineer, Data Analyst, AI/ML Engineer, Cloud Engineer, and Technical Support Engineer.

General Skills

Programming fundamentals, object-oriented programming, databases, SQL, Git, problem solving, communication, debugging, and basic software development concepts.

Fresher Training

Selected engineering freshers complete a 12-week training program.

Training Weeks 1–4

Programming fundamentals, OOP, SQL, databases, Git, debugging, software development lifecycle, and engineering practices.

Training Weeks 5–8

Frontend, backend, REST APIs, authentication, testing, and application development.

Training Weeks 9–12

Team project, code reviews, deployment, monitoring, documentation, and final evaluation.

Hiring Process

Typical process: online assessment, technical interview, practical coding or project discussion, and HR interview.

Internship Duration

Most internships last between 8 and 16 weeks.

Fresher Growth

A typical progression is Graduate Engineer → Software Engineer → Senior Software Engineer → Technical Lead or Engineering Manager, depending on performance and career interests.

9. Employee Working Policies

Working Hours

9:30 AM to 6:30 PM, Monday through Friday, normally including a one-hour lunch break.

Attendance

Employees should maintain accurate attendance records and communicate planned absences to their manager.

Flexible Scheduling

Certain teams may use approved flexible schedules based on customer and project requirements.

Hybrid Policy

Eligible employees can work remotely up to two days each week.

Probation

New employees normally have a six-month probation period unless their employment agreement specifies otherwise.

Notice Period

The standard notice period is 60 days unless a different period is specified in the employee's employment agreement.

Overtime

Work beyond normal hours should be planned and approved when required by project or customer commitments.

10. Leave and Holidays

Annual Paid Leave

24 days per calendar year for full-time employees.

Sick Leave

10 days per calendar year.

Public Holidays

12 company holidays are observed each year.

Casual Leave

Casual leave may be granted according to the applicable employee policy and manager approval.

Parental Leave

Eligible employees may receive parental leave according to company policy and applicable law.

Leave Request

Planned leave should normally be submitted at least three working days in advance.

Emergency Leave

Employees should inform their manager as soon as reasonably possible.

Holiday Calendar

Human Resources publishes the annual holiday calendar before the beginning of each year.

11. Compensation and Benefits

Salary Review

Performance and salary reviews normally occur once each year.

Performance Bonus

Eligible employees may receive an annual performance bonus based on individual, team, and company performance. It is not guaranteed.

Health Insurance

Eligible full-time employees can enroll in company-sponsored health insurance.

Learning Allowance

Employees can claim up to INR 15,000 per calendar year for approved courses, books, certifications, and learning resources.

Retirement Benefits

Eligible employees receive statutory retirement and social security benefits according to applicable Indian regulations.

Employee Recognition

TechNova may provide quarterly recognition awards for exceptional technical contributions, customer impact, innovation, or teamwork.

Payroll

Salary is processed monthly through the company's payroll system.

12. Recruitment FAQs

Does TechNova hire freshers?

Yes. TechNova recruits freshers for software engineering, QA, data, AI/ML, cloud, and support roles when openings are available.

What is the typical fresher hiring process?

Online assessment, technical interview, practical coding or project discussion, and HR interview.

What should a fresher prepare?

Programming, OOP, SQL, DBMS, data structures, basic web development, Git, APIs, project knowledge, and communication.

Is prior work experience required for fresher roles?

No. Fresher roles are designed for candidates with limited or no professional experience, although internships and projects are useful.

Are internships available?

Yes. TechNova offers software engineering and AI internships depending on business requirements.

How long is fresher training?

The standard engineering training program lasts 12 weeks.

Can freshers work remotely?

Eligible employees may work remotely up to two days per week, subject to team policy.

13. Engineering Practices

Version Control

Git is used for source code version control.

Branching

Teams generally use feature branches and pull requests for changes.

Code Review

Production code normally requires at least one peer review before merging.

Testing

Projects are expected to include appropriate unit, integration, API, or end-to-end tests.

Documentation

Important services should have setup instructions, API documentation, architecture information, and operational notes.

Deployment

Applications are deployed through controlled development, testing, and production environments.

Monitoring

Production services should have appropriate logging, health checks, error monitoring, and performance monitoring.

14. Security and Data Protection

Credentials

Passwords, API keys, access tokens, and database credentials must never be committed to public repositories.

Access Control

Employees receive only the access required for their role and project responsibilities.

Confidential Information

Customer data, source code, product plans, credentials, financial information, and non-public business information are confidential.

Data Handling

Sensitive information must only be stored and processed in approved systems.

AI Tool Usage

Confidential company or customer data must not be submitted to an AI service unless that service is approved for the relevant data.

Security Incidents

Suspected security incidents must be reported immediately through the internal security reporting process.

Device Security

Company devices should use screen locks, approved security software, and current security updates.

15. AI and Responsible AI Policy

Approved AI Use

AI tools may be used for code assistance, documentation, research, testing, summarization, and approved business workflows.

Confidentiality

Sensitive company or customer information must not be entered into unapproved AI systems.

Human Oversight

High-impact AI outputs should be reviewed by qualified employees before being used for business decisions.

Accuracy

AI-generated information should be verified when accuracy is important.

Bias and Fairness

AI systems should be evaluated for inappropriate bias and harmful outcomes where relevant.

RAG Systems

RAG applications should retrieve relevant source material, preserve source metadata, and avoid presenting unsupported claims as facts.

16. Customer Support

Support Channels

Customers can submit support requests through the customer portal or approved support channels.

Priority Levels

Tickets are categorized as Critical, High, Medium, or Low based on business impact and urgency.

Critical Issue

A production outage or severe issue affecting a major business function.

High Issue

A significant degradation or issue affecting an important business function.

Medium Issue

A limited issue with an available workaround.

Low Issue

General questions, minor defects, documentation requests, or low-impact issues.

Support Hours

Standard support operates during business hours. Enterprise customers may have separate support agreements.

17. Projects and Internal Initiatives

AI Knowledge Assistant

An internal RAG-based assistant can retrieve information from approved company documents and answer employee questions with source references.

Developer Productivity

TechNova invests in CI/CD automation, developer tooling, reusable components, and engineering documentation.

Cloud Modernization

The company is gradually moving suitable workloads toward containerized and cloud-native architectures.

Learning Program

Employees are encouraged to complete technical courses, internal workshops, and professional certifications.

Innovation Program

Employees can propose internal prototypes and proof-of-concept projects through the quarterly innovation program.

18. Frequently Asked Facts for RAG Testing

Who founded TechNova?

Sreehari V S founded TechNova Solutions Pvt. Ltd. in 2019.

When was TechNova founded?

2019.

Where is the headquarters?

Kochi, Kerala, India.

Who is the CEO?

Sreehari V S is the Founder and CEO.

What is NovaAI?

NovaAI is TechNova's artificial intelligence platform.

What is NovaFlow?

NovaFlow is the company's workflow automation platform.

How many annual paid leaves are provided?

24 days per calendar year.

How much sick leave is provided?

10 days per calendar year.

How many remote days are allowed?

Eligible employees may work remotely up to two days per week.

How long is fresher training?

12 weeks.

What is the standard notice period?

60 days unless the employment agreement specifies otherwise.

What is the learning allowance?

Up to INR 15,000 per calendar year for approved learning expenses.

What are standard working hours?

9:30 AM to 6:30 PM, Monday through Friday.

How many hiring stages are typical?

Four stages: online assessment, technical interview, practical coding/project discussion, and HR interview.

19. Information Boundaries

CEO Salary

The handbook does not provide the CEO's salary.

Individual Salary

The handbook does not provide individual employee salaries.

Customer Confidential Data

No customer confidential data is contained in this knowledge base.

Revenue

No financial revenue figures are provided.

Stock Price

TechNova's stock price is not provided.

Corporate Registration Number

No corporate registration number is provided.

Private Founder Contact Details

No personal phone number, home address, or private contact information for Sreehari V S is included.

Unlisted Policies

If a user asks about a policy not contained in this handbook, the RAG assistant should state that the information is not available in the provided knowledge base rather than inventing it.

20. RAG Grounding Rules

Authoritative Source

For this project, this handbook is the authoritative company knowledge source.

Answer Policy

The assistant should answer using information retrieved from this document.

Unknown Questions

If the retrieved context does not contain the answer, the assistant should say that the information is not available in the provided company knowledge base.

No Hallucination

The assistant should not invent company facts simply because a question sounds plausible.

Source References

The application should preserve document metadata and, where possible, display the page or section used to answer a question.

Multiple Sources

When multiple chunks are relevant, the assistant may combine them while keeping the answer grounded in retrieved content.

RAG Evaluation

The application should be tested with questions whose answers are in the document and questions whose answers are intentionally absent.

21. Document Metadata

Document Name

TechNova Solutions Pvt. Ltd. — Master Company Knowledge Base

Version

3.0

Year

2026

Company

TechNova Solutions Pvt. Ltd.

Founder

Sreehari V S

Project Owner

Sreehari V S

Primary Purpose

Knowledge source for an AI-powered RAG company assistant.

Expected Retrieval

Semantic similarity retrieval over document chunks.

Expected Generation

Grounded responses generated from retrieved company information.
